Fruit Plants

O Our Friends of Former Years, And Any Who May Read These Pages.

We come greeting you with our best wishes for another prosperous year. The outlook for the future is good and we believe there will be a greater demand than ever for all varieties of fruit plants. For truly the fine grade of fruit raised in the United States is a blessing to the workingman and his family. And as we present you with this Catalogue of new and standard varieties, representing the plants we have for sale, we will say that never has there been a year when plants have made a finer growth and were in better shape to please our customers. As perhaps you know our plants are grown in the fruit belt of southwestern Michigan, the soil of which is especially adapted to plant life. Anyone wishing to purchase plants for their own setting realize the value of this strong, early, vigorous growth, and on this account the less danger of plants dying. Our state inspector has visited us again and assures us that our plants have no diseases such as are found in some localities. To our old customers we will say that we thank you for your past favors and will treat you right in the future. To any new customers would say that you shall receive good value for all orders sent to us. Our motto is "Dare to do Right," believing that only square dealing is the road to success.

PRICES.

Our prices are not high but we ask those in want of large lots to let us price them as we can sometimes make a reduction on such. We propose to "Live and Let Live." Consequently you will find us ready and willing to do the very best we can by our patrons and we do not intend to be undersold by any reliable dealer.

LOCATION.

We are located about fourteen miles south from St. Joseph on the Pere Marquette R. R. (formerly Chicago & West Michigan R. R.)

MODE OF SHIPMENT.

We ship by express unless requested by purchaser to ship otherwise. All express companies carry nursery stock at a discount from the usual rate of ordinary merchandise. We have sent a great many plants long distances by freight and had them go safely and arrive at their destination in good condition but we consider the express safer.

TIME.

We commence filling orders as soon as the ground is in condition for digging and continue the work as orders are called for. Should plants arrive before ground is ready for them be sure and open the bunches before heeling them in, placing them carefully in a trench press the soil firmly around the crown and moisten if needed.

TERMS.

Our terms are, no order booked without a remittance, balance before shipment. All packages will be put up in the best manner in boxes, crates or baskets with no extra charge to purchaser and delivered F. O. B. at Bridgman. We promise to start our plants in good condition after which purchaser must assume all risks as our responsibility ceases when packages leave our hands. We use great care to have our plants genuine, and no others will intentionally be sent out. But should mistakes occur we hold ourselves ready upon proper proof to refund the money or replace the plants but will not be held responsible for any further damage.

RATES.

One half dozen at one dozen rates, fifty at one hundred rate, and five hundred at one thousand rate. Add twenty five cents per hundred if sent by mail. Remittance may be made by express or P. O. money order or draft on Chicago or New York banks or by registered letter. Do not send checks on local banks.

CORRESPONDENCE.

We are always willing to answer any questions our friends may wish to ask and a correspondence is often beneficial to both parties. Will be thankful for name of any fruit growing neighbor and we will mail him a catalogue.

ORDERS.

We would advise those wishing plants to order them early. Any one who will send us an order amounting to \$10.00 together with the enclosed coupon before March 1st, 1901, will receive the Farm Journal for five years with no expense to themselves. The Farm Journal is one of the spiciest, most instructive and up to date papers now published. It contains interesting matter for old or young, for farmer or fruit grower and is a pleasure as well as a profit to any one who may read it. Or, if you prefer, we will send you plants equal in value to coupon. To anyone wishing large orders we would say, *write to us*, as we can make a reduction on such.

Strawberries.

The earliest, the handsomest and the best of all the summer fruits. They are profitable to the grower, healthful to the consumer and satisfactory in all ways to every one who has any dealing with them. There are varieties for all kinds of climate and soil, so we say by all means set strawberries.

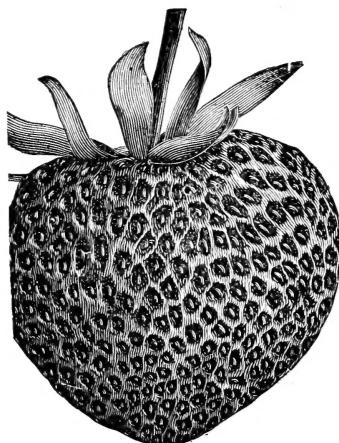

BRANDYWINE.—This variety has fulfilled all that it promised. We are fully satisfied with our experience in growing Brandywine. It is one of the strongest growers with healthy foliage, fruit large and perfect in form, ripening evenly, a dark, rich color, with large, green calyx. Continues a long time in fruit and considered by many to excel for canning purposes, as it does for shipping. Season from medium to late. \$2.50 per thousand.

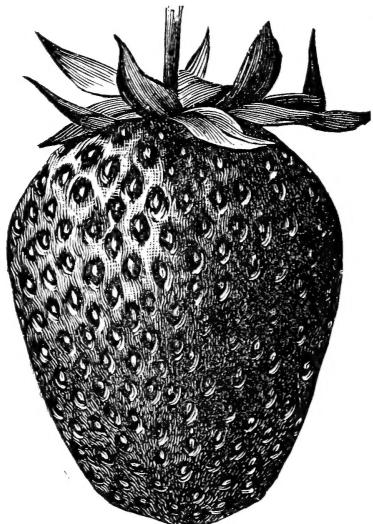

BEDERWOOD.—Valuable in some seasons and in some localities. When it does not rust the fruit is fair size, of dark crimson color, and very productive and a good pollenizer for early sorts, with the habit of making plenty of plants. \$2.00 per thousand.

BUBACH.—It is a well tried variety and a general favorite. We have raised it for a number of years and it never has failed to do its share in giving us a bountiful supply of large, handsome berries. The foliage is healthy and a good grower, yielding plants enough for a profitable row. They are always in good demand, which goes to show they are appreciated by fruit growers generally. \$2.75 per thousand.

BENNETT'S SEEDLING.—Another new berry which bears a first class recommend. The season is so prolonged that those growing for family use cannot help being pleased with it. It is of fair size, short conical, with the ability to remain several days without softening after being picked. \$5.00 per thousand.

BRANDYWINE

BARTON'S ECLIPSE

BARTON'S ECLIPSE.—This variety stands among the first in the field and also on the stand. It has stood the test for a number of years and still holds its own with many of the later varieties now being boomed. It is a strong grower, handsome foliage, free from disease. Fruit of good form and color, large, and equally as productive as Bubach. It was originated several years ago by T. B. Barton of Kentucky, and we can truly say he did the world a favor in producing so valuable a berry. \$2.25 per thousand.

BUSH CLUSTER.—Is a new berry and from what we know of it possesses some qualities which many others lack. It is an early berry and in some ways resembles Parker Earle. The high growth and strong stems keep the fruit free from sand and dust consequently needs no mulching. The berries

ries are said to be of excellent quality, large size, color rather dark, firm, and a good shipper as well as a bountiful yielder. They grow in large clusters which gives the name and is a delight to the pickers. \$2.00 per hundred.

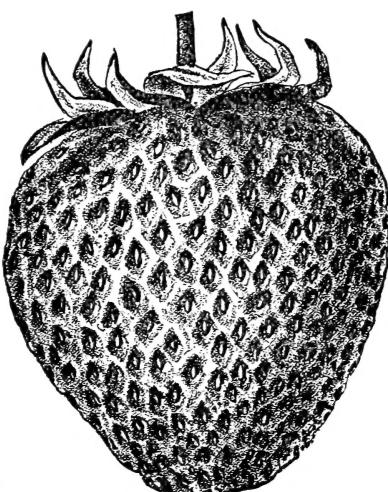

BISMARCK.—A seedling of Bubach, but the plant is much more vigorous and makes enough plants for a good row with strong roots. The fruit is good size, good shape, fine color, with quality superior to Bubach and more productive. \$2.50 per thousand.

CARRIE.—A seedling of the Haverland. Very productive with berries resembling Haverland, but firmer, consequently a better shipper. \$3.00 per thousand.

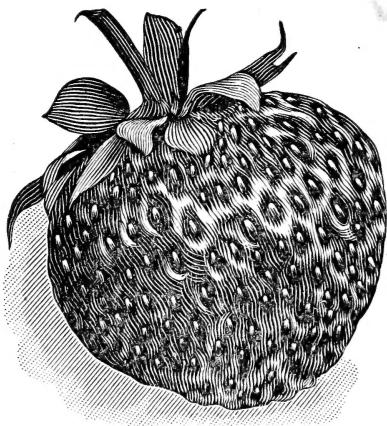

COBDEN QUEEN.—Is spoken of by many as being very successful, being a handsome, well shaped berry, crimson color, ripening earlier than Crescent, and excellent in flavor. Plants are vigorous with abundant and healthy foliage. \$2.50 per thousand.

DAYTON.—An early variety of good size, productive and of excellent quality. \$2.00 per thousand.

DEW.—Originated near Lansing, Michigan. The plant is a very luxuriant grower, foliage dark green and very rank and healthy. Fruit of the largest size and firm. Perfect in shape, color dark glossy red. Will not fail to please the most fastidious. \$3.00 per thousand.

BISMARCK

CLYDE

CLYDE.—A robust, strong grower light green, healthy foliage. A strong staminate, suitable for fertilizing medium early pistillates. It has long, strong roots, consequently stands drouth. Very productive of large, perfect shaped berries, a very satisfactory berry with us and we think it is generally so considered. \$2.50 per thousand.

CRESCENT.—This is an old and reliable sort, often called the "lazy man's favorite" owing to its ability to take care of itself, and yet it is a variety not to be despised, as it always responds to fair treatment and can be relied on for a crop when many other kinds fail. It is especially adapted to sandy soil, as it is a great plant producer and on rich loam makes an over-

crowded matted row. On such soils plants might be set farther apart in the rows. \$1.75 per thousand.

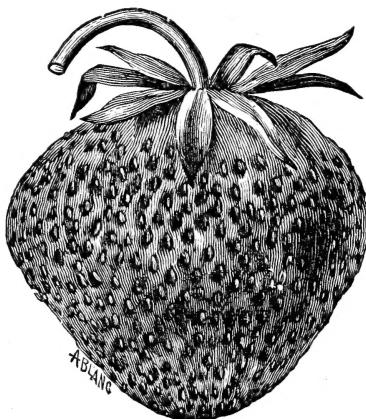

EXCELSIOR.—This without doubt is the best very early variety yet introduced. It is not only the earliest, but is good size, good color, firm and productive. A remarkably vigorous grower. It was originated by Jacob Bauer who also originated Van Deman, Bismarck and other valuable varieties. We have always found what he pronounced good to be as recommended. It is a cross of Wilson and Hoffman. \$2.00 per thousand.

GREENVILLE.—This berry was introduced by E. M. Buechly, Ohio. The plants resemble very closely the Bubach, but is a better plant maker and consequently makes a better matted row. Foliage very clean and healthy. It is very productive of good sized fruit of good color. Season medium to late. \$2.25 per thousand.

SPLENDID.—This is a good all around variety. Healthy, robust plant, makes a good matted row, and very productive. The fruit is good size, good color, and is very popular where known. Its qualifications make it a splendid berry as well as Splendid in name, \$2.25 per thousand.

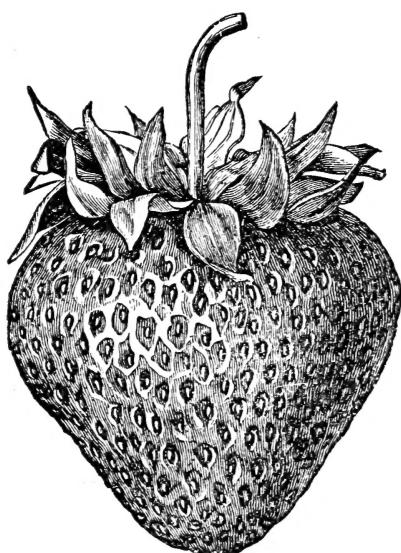

LADY THOMPSON.—Is popular in some localities. Strong, healthy plant, and what is very important, thrives on quite light sandy soil. Fruit is fair size, conical in shape, bright scarlet in color, firm and good quality and productive. \$2.50 per thousand.

ENHANCE.—Is a late sort and productive. Berries large and somewhat rough in appearance, and so are not as attractive as some varieties. They stand frost well and are liked by many growers. \$2.50 per thousand.

GREENVILLE

ENORMOUS.—This is a berry that is appropriately named, and will not fail to give general satisfaction if well cared for. Fruit similar to Bubach, but averages larger and is a better shipper. It is a late, showy berry and productive, and is just what we want when we get it. \$2.75 per thousand.

GANDY

GANDY.—A well known and popular late variety which seems to do well under all conditions unless it would be on light sand. It is one of the choicest in quality, good color and a standard for firmness, qualities which make it desirable for either a home or market variety. It holds its size well from first to last and although not as productive as some it is a profitable sort, coming in after the glut and prolongs the season. Does best on good strong loam. \$2.00 per thousand.

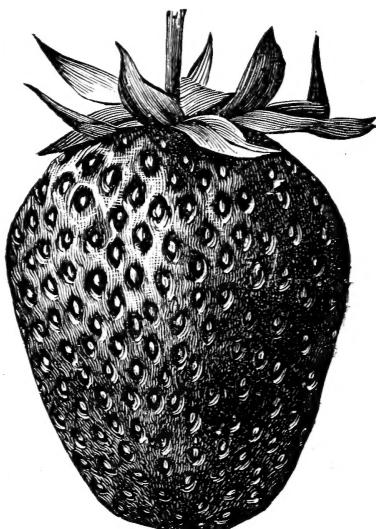

JESSIE.—A strong, healthy plant and vigorous grower. Fruit large, glossy, crimson color, of good quality. It does not succeed as well as some in all localities, while in others it does finely. It has been used as a pollenizer as it is strong in pollen. \$2.50 per thousand.

TENNESSEE PROLIFIC.—Is a cross of Sharpless and Crescent which has resulted in producing a most valuable variety. It inherits the large size of Sharpless and the productiveness of the Crescent. It is a vigorous grower, free from rust and especially valuable as a pollenizer. \$2.25 per thousand.

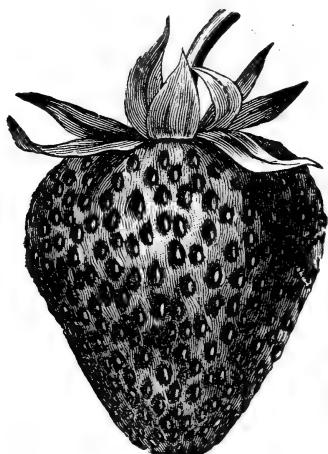

HAVERLAND.—This is one of the older sorts and one of the most popular. There is always a strong demand for plants of this variety. The foliage is healthy, a good runner and has uncommonly strong roots which enable it to withstand drouth exceedingly well. The berry is long in shape and is a bright light crimson color which does not change after picking, making it very attractive. \$2.50 per thousand.

VAN DEMAN.—An early variety, good color, good size, fruit firm and good quality. Resembles Warfield and is a good pollenizer for early sorts. \$2.75 per thousand.

UP-TO-DATE.—Plant very vigorous and healthy, large staminate blossom. Fruit good size, fine shape and color, being dark red to center, very firm. It is a new variety which was introduced about two years ago and comes highly recommended. \$3.00 per thousand.

HAVERLAND

LOVETT

LOVETT.—This has been before the public long enough to be thoroughly tested both north and south, east and west, and is one of the few that has been universally adopted. It is not only a first class all around berry but one of the best to do duty as a pollenizer. The plant is a strong, healthy grower, clean foliage, fruit medium in size, high, rich color, firm and productive. It is commonly paired with the Warfield and others of its season as a pollenizer. It is very reliable and will succeed in almost all soils and conditions. \$1.75 per thousand.

WARFIELD.—This is an old standard and profitable sort for market and there is always a great demand for plants. It succeeds almost everywhere. As it is a good runner it rarely fails making a good row. Berries are medium size and firm, color dark red. Many raise it almost exclusively with only some pollinating sort with it. \$1.75 per thousand.

MARSHALL.—This is a native of Massachusetts. It started out with the high commendation of the great strawberry Specialist, Matthew, Crawford. The Michigan Experiment Station for 1897 says, "another season's trial confirms the good opinion we had formerly expressed. With us it makes a strong healthy growth, perfect blossom. They are a model berry in color, shape and size and also very firm, points remarkable in a berry so large. It is fine flavored, and we would recommend planting Marshall. \$3.00 per thousand.

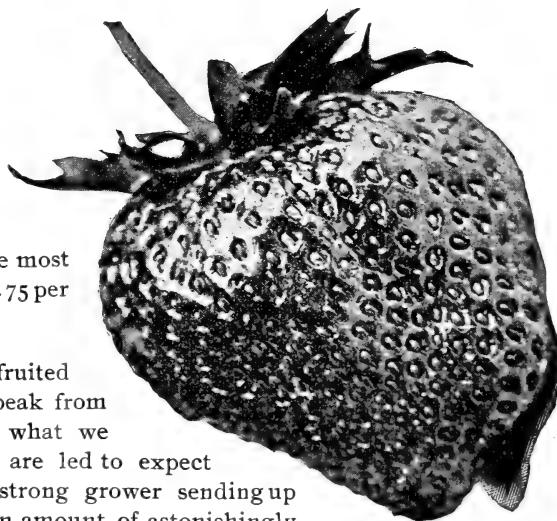

MARY.—This is a very strong plant grower with healthy foliage. The fruit is of beautiful color, very large, firm, and productive. Fruit holds size to the last. Certainly a good combination, \$3.00 per thousand.

MICHELS EARLY.—Is one of the earliest and one of the best known varieties. It is extensively grown and usually proves profitable on account of its earliness. It remains a long time in bloom is well provided with pullen, consequently is a good pollenizer. The plants are rather small but are full of vitality, and sure to live and make a good row. The berries are not large but of excellent quality. \$1.50 per thousand.

MARGARET.—A new variety, introduced as one of the most valuable which has been brought out for a long time. It seems to combine all desirable points in a remarkable degree. The plant is vigorous and healthy, throwing out strong runners liberally, perfect blossom, fruit perfect in shape, dark glossy crimson and evenly colored, firm and excellent flavor. \$3.00 per thousand.

RIDGEWAY.—This is comparatively a new variety from M H. Ridgeway of Indiana. It is a very promising sort. We had nothing on our grounds last season that gave more satisfaction than Ridgeway. The plant is very vigorous, clean and healthy, making a fine row on soil only moderately rich, producing a fine crop of the most beautiful berries, nearly round in shape, with a glossy bright color of the Haverland good size and very uniform, uncommonly firm. It was produced from the seed of Jersey Queen crossed with the Parker Earle a good pollenizer. \$2.50 per thousand.

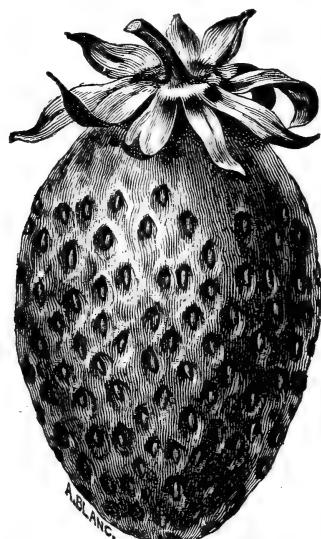

NICK OHMER.—A new Ohio variety. The plant is very robust and thrifty making a very luxurious growth a perfect blossom and is very productive. It is a beautiful crimson color, delicious flavor, one of the very largest in size and an excellent shipper. It is one of the most popular of the new varieties. \$2.75 per thousand.

NICK OHMER

SAMPLE.—We have not fruited this variety and consequently speak from the experience of others. From what we have heard, in regard to it we are led to expect great things. The plant is a strong grower sending up strong fruit stems which yield an amount of astonishingly large, bright red, moderately firm berries of good quality. Its productiveness, size and beauty makes it a desirable berry, and it will without doubt be ranked among the first which has come to stay. \$2.50 per thousand.

WM. BELT.—Originated in southern Ohio. Among the large size berries none are more uniform in shape and size than this variety. It is also very firm and most excellent quality, color a beautiful glossy crimson. The fruit always brings highest price in market. The plant is a good thrifty grower with strong roots and makes just sufficient plants for a good matted row without crowding. It is better in quality and larger in size and is also a better grower than Bubach. It pays to put this variety on good soil and give good culture. \$2.50 per thousand.

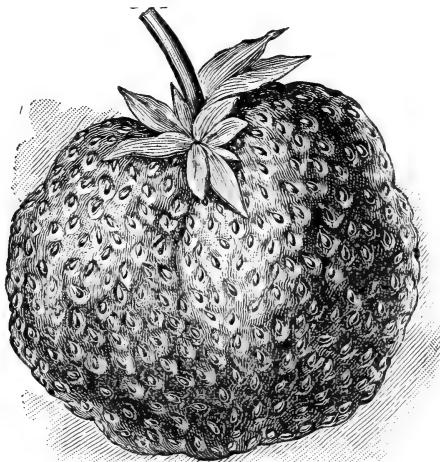

PARKER EARLE

PARKER EARLE.—No plant more strong and robust, making an enormous stool. Trusses large holding its load of luscious berries well up from the ground. Berries long conical shape with short neck. Quality the very best, firm and retaining its freshness long after being picked. Has long strong roots which enable it to withstand drouth. When grown on rich soil it will not fail to give satisfaction. \$2.75 per thousand.

WILSON.—This was introduced more than forty years ago and was called Wilson's Albany. For many years it was the leading variety and on soil adapted to it raised great crops of beautiful fruit, being very firm and uniform in size and always evenly colored. It made an ideal market and shipping berry. \$2.25 per thousand.

SHARPLESS.—An old and well known sort of excellent quality, but blossoms tender and liable to injury from late frost in spring, adapted to loamy soil. \$2.75 per thousand.

PRIDE OF CUMBERLAND.—Firm like Gandy but more productive owing to its firmness it is a very valuable shipping variety to very distant points. \$5.00 per thousand.

ROUGH RIDER

of a market variety as well as for home use. The plant is a good, thrifty, healthy grower with clean foliage. Productive of good size fruit, beautiful color and firm, smooth, even, conical in shape and number one in quality. \$2.50 per thousand

ROUGH RIDER.—Originated in Oswego County New York by Chas. Learned. A seedling of Eureka fertilized by Gandy. It is a good runner and enormously productive. Berries very large, color dark red like Gandy. What makes it especially valuable is its extreme firmness which enables the grower to ship to very distant markets. It is also a late berry, which taken in connection with its great size and attractive appearance cannot fail to make it one of the most valuable varieties grown. \$20.00 per thousand.

WOLVERTON.—This variety was originated in and introduced from Ontario by the late veteran fruit grower John Little. It has all the characteristics

Raspberries.

KANSAS

KANSAS.

One of the most valuable introduced into the blackcap family. Its strong points are: Very strong cane with numerous laterals. Berries nearly as large as Gregg, jet black, firm, and of the best quality. Stands drouth and cold, holds its foliage well, and is very productive. \$6 per thousand.

Gregg.

This is one of the older and best known varieties and on good soil is hard to beat, being large and luscious and productive. It is a strong grower but not quite hardy in exposed situations. \$5.50 per thousand.

PALMER.

A very early blackcap, productive and thoroughly hardy. It sends out numerous laterals which are filled with jet black berries. It has been thoroughly tested and is well liked by many. \$4 75 per thousand.

EUREKA.

This variety may be considered an early berry, although not as early as some. Fruit large and firm and excellent quality. Very attractive in appearance. Canes strong, bright and healthy and quite hardy and enormously productive. \$1 per hundred.

CONRATH.

This variety has been in cultivation in the eastern part of the state for several years but only recently has it been introduced into this section. It has already become very popular as it compares favorably with the best of the other varieties cultivated here. The Michigan experimental station says: The plant is fairly vigorous and productive, fruit of large size, moderately firm, nearly coal black, and parts readily from the core. Although early it has a long season and holds its size well to the end. \$6 per thousand.

MILLER. (Red.)

This valuable red raspberry originated in Delaware where it has been a very popular variety for several years but has been now generally disseminated and where known is considered one of the very best. It is a very rich red in color which it holds long after being picked. Does not crumble, being very firm, making it a superior shipping variety. The quality is excellent. Very productive, large size, early. Bush hardy. \$1 per hundred.

OLDER.

Has been tested for several years and found to be hardy and productive. It is certainly worthy a trial. \$4 per thousand.

MARLBOROUGH.

This variety of red raspberry ranks with the first of its class being very large, hardy and productive. The fruit is bright crimson in color and of excellent quality. Early. \$4 per thousand.

BRANDYWINE.

One of the oldest varieties, berries good size. Very firm, making it a good shipper. No red raspberry shows so bright and attractive color as the Brandywine. Quality not equal to Cuthbert. \$4 per thousand.

CUTHBERT.

An old standard variety and we place it at the head for quality. Plant vigorous, very prolific. Fruit large, conical, delicious and firm. If we were to plant only one kind it would be Cuthbert. \$4 per thousand.

HANSEL.

A profitable early variety. Berries good size, good color and firm, productive. \$5 per thousand.

Blackberries.

KITTATINNA.

One of the oldest as well as one of the best. Berries large and flavor excellent. Strong, erect cane, very productive. One of the most popular of the old sorts. Quite hardy. \$5 per thousand.

LAWTON.

This as well as Kittatinna is an old and popular sort either for home use or for market. Berries large, round, and of good quality. Very productive 75c per hundred.

TAYLOR.

One of the most delicious blackberries grown and if on rich soil inclining to moisture, is very productive. Canes of strong growth of a peculiar greenish yellow color and very hardy making it invaluable at the north. The fruit has a peculiar flavor more like the wild blackberry. \$6 per thousand.

WILSON'S EARLY.

One of the very largest and most productive of the early varieties. Produces berries in large clusters of glossy black color which holds well long after picking. One of the best market and shipping berries. Needs protection at the north. \$5 per thousand.

ELDORADO.

Is comparatively a new variety but has been cultivated under careful tests long enough for growers to feel perfectly safe in setting it. The bushes are vigorous and hardy. Their yield enormous. Berries are large, jet black and ripen well together. Very sweet and pleasing to the taste. \$10 per thousand.

EARLY HARVEST.

The only very early variety in cultivation to any extent in this vicinity. The bush is quite compact in form, very productive. Fruit medium in size, good quality. Valuable for its earliness and profitable on that account. Needs protection in winter. \$4.50 per thousand.

ERIE.

Is claimed to be the hardiest variety yet introduced, not having failed in producing a fine crop each year since it was originated. Round in form, fruit large, resembling Lawton in size and form. Very productive. The demand for plants exceeds the supply every year. \$8 per thousand.

SNYDER.

Very hardy, consequently much raised in cold climates. Berries medium size, juicy, rich. Strong, stout cane. Thrifty growth with a very broad leaf. \$6 per thousand.

ERIE.

LUCRETIA (Dewberry)

The plant grows trailing on the ground. Is hardy and very productive. The berries are large and much more delicious and ripe earlier. Glossy black color. \$7 per thousand.

Kind Words From Some Our of Patrons.

Floyd Knobs, Ind.

A. R. Weston & Co.

Dear Sirs.—The raspberry plants came all right and were very fine. Thanks for extras.
Yours,

K. S. James.

New London, Ohio.

A. R. Weston & Co.

Dear Sirs.—We had an order for Gandys from you two years ago and they gave good satisfaction. The plants did well and the berries sold well on the market last year, and we hope we may receive as nice a lot this time.

Yours Truly,

Ralph R. Barrett.

North Loop, Neb.

A. R. Weston & Co.

Gentlemen.—The berry plants arrived to day, I have taken them all out of the crate and heeled them in. They were in good condition and I think they are very nice. They are perfectly satisfactory.

Yours,

Jas F. Thrasher.

Carthage, Mo.

A. R. Weston & Co.

Dear Sirs.—Plants came by freight all right. They reached here in good condition.
Yours,

J. H. Turner.

Ithica.

A. R. Weston & Co.

Gentlemen.—Your plants came to me in good condition. The Elderado were especially fine.

Respectfully,

F. W. Brooke.

Humboldt, Tenn.

A. R. Weston & Co.

Gentlemen.—The plants came to hand at the end of ten days after you started them and but for your excellent system of handling and packing they must have spoiled enroute as it was they came through in good order.

Respectfully,

H. G. Rowoland.

Monroe, Iowa.

A. R. Weston & Co.

Gentlemen.—I received the raspberry tips the 10th and will say that they were in the best condition of any ever received heretofore from any firm.

Yours,

Thomas Wilks.

Still Pond, Ind.

A. R. Weston & Co.

Sirs.—The plants received in good condition, they are fine. Every thing satisfactory.
Yours Truly,

J. S. Harris.

Janesville N. Y.

A. R. Weston & Co.

Gentlemen.—Plants came in due time and apparently in as good condition as when first taken from the ground. They were fine plants and satisfactory in every way.

Yours Truly

Dwight Handford.

A. R. Weston & Co.

Plants came in good time and in fine shape. I Write this simply to say that I never saw as fine strawberry plants and so nicely packed. You take not only the cake but the whole bakery, and when I need more plants in your line you will hear from me.

H. C. S.

Nevada, Ia.

A. R. Weston & Co.

Gentlemen.—Plants arrived last evening O. K. They are good enough for any one.

Respectfully,

Jas. Blackman & Son.

Colchester, Ill.

A. R. Weston & Co.

Dear Sirs.—Have received the plants to my entire satisfaction. Thanks for your liberal count.

Yours Truly,

John Stephens.

Chenoa, Ill.

A. R. Weston & Co.

Gentlemen.—The plants arrived yesterday evening, the very best of time. Examined a few bunches and believe they are in prime condition.

Yours Respectfully,

Louis Warner.

Columbus, Ky.

A. R. Weston & Co.

Dear Sirs.—My plants reached here Saturday evening in much better condition than I expected being on the road twelve days. They are nice plants. The Clydes are the largest plants I ever saw.

Yours Respectfully,

Geo B. Pennebaker.

Take notice of the advertisers in our Catalogue. They are gentlemen you can depend upon. It will be to your advantage if you need anything in their line to patronize them. You will find them up to date and prompt in all their dealings.

National Fruit Grower

Is the Largest Horticultural and Fruit Trade Publication West of New York. Published monthly at

ST. JOSEPH, MICHIGAN

Keeps you posted on Horticulture, Crop Conditions, Prices of Fruit Products in the Different Markets, Fruit Trade Matters; Diseases of Trees and Plants and Treatment of same. You will like it, if you grow a tree or vine. It deals with every phase of the fruit industry from the field to the market, including varieties, cultivation, transportation,

Subscript'n 50 cents
Price a Year

and the final sale in the market. It tells the growers who they may safely send their goods to, in the cities of the country, guards them from the wiles of "snide" commission houses, and gives just the information the grower needs, whether he be an amateur or professional. Publishes market reports from different cities, giving a summary of prices.

THE NATIONAL FRUIT GROWER

Is one of the most practical and progressive Fruit Papers published.

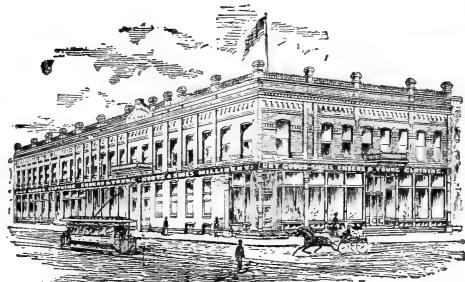

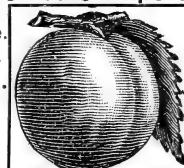

Contained each month information worth many times the subscription price.
